CBT QUESTION PAPER
CLASS 5

Read the passage and answer the questions

The name 'Hershey' chocolates are popular throughout the world. When Milton finished fourth grade, he went to work for a printer. But, Milton did not like this kind of work and soon he got a new job in a candy factory. After a few years, Milton started his own candy business. In four years, his business was very successful. After seeing how chocolate was made Milton opened a chocolate factory.

Hershey built a town called Hershey in the USA, with houses, schools, churches, and stores so the people who worked in his chocolate factory could live nearby. When his wife died, Milton took all of his money and gave it to orphanages. Milton Hershey died in 1945, but the world remembers him for not only making chocolates, but for his work to help people. He is someone who made a medical centre to help those who are sick and someone who made chocolate, that yummy chocolate that most of us all over the world enjoy.

- A) मछला
B) मछली
C) मछलियाँ
D) मछलें

MATHS

1. Which of the following represents the number name for 4,738 in the Indian place value system?
- A) Forty-seven hundred thirty-eight
B) Four thousand seven hundred thirty-eight
C) Four thousand seven hundred thirty-eighty
D) Forty-seven thousand thirty-eight
2. In the number 9,999, what is the place value of the 9?
- A) Thousands
B) Tens
C) Hundreds
D) Ones
3. Which of the following shows the number 5,024 in expanded form?
- A) $500 + 20 + 4$
B) $5000 + 200 + 4$
C) $5000 + 0 + 20 + 4$
D) $5000 + 200 + 40$
4. Look at the following group of numbers: 4382, 4832, 4238, 4328. Which is the correct ascending order?
- A) 4832, 4382, 4328, 4238
B) 4238, 4328, 4382, 4832
C) 4238, 4382, 4328, 4832

D) 4328, 4238, 4382, 4832

5. If a student shades half of a shape, which fraction represents the shaded part?

A) $\frac{1}{4}$

B) $\frac{1}{3}$

C) $\frac{1}{2}$

D) $\frac{2}{1}$

6. A teacher has a collection of 20 beads and asks a student to find $\frac{1}{4}$ of the collection. How many beads is that?

A) 4 beads

B) 5 beads

C) 10 beads

D) 2 beads

7. Identify the pattern in this number sequence: 1025, 1050, 1075, _____. What is the next number?

A) 1080

B) 1100

C) 1125

D) 1200

8. Using the digits 4, 7, 3, and 8 exactly once, what is the largest 4-digit even number you can make?

A) 8734

B) 8743

C) 7834

D) 8473

9. A student is recording data about favorite foods. If 12 students brought Chapatis and this is exactly $\frac{1}{2}$ of the total class, how many students are in the class?

A) 6 students

B) 12 students

C) 24 students

D) 36 students

10. A traveler needs to pack 4-digit identification codes for 5 different bags. If the codes follow a pattern where

each code is 150 more than the previous one, and the first code is 2,100, what is the code for the 4th bag?

- A) 2,250
- B) 2,400
- C) 2,550
- D) 2,700

TWAU

1. Which of the following is a "root" vegetable that stores its food underground?

- A) Tomato
- B) Spinach
