

CBT CLASS XI MATHS AUGUST 2024-25

GENERAL INSTRUCTION :

CHAPTER: RELATION AND FUNCTION & TRIGONOMETRIC FUNCTIONS

Sr.No	Question	Marks
	<p>Case Study 1</p> <p>A company is designing a delivery drone that can carry packages up to a certain weight. The weight of a package (in kilograms) is the input for a function that determines the maximum flight time (in minutes) the drone can achieve with that weight.</p> <p>Function: $f(x) = 30 - 2x$ (where x is the weight of the package in kilograms)</p>	
1	<p>Which of the following correctly describes the domain and range of the function in the context of the delivery drone?</p> <p>a) Domain: $\{x \in \mathbb{R} \mid x \geq 0\}$, Range: $\{y \in \mathbb{R} \mid y \leq 30\}$</p> <p>b) Domain: $\{x \in \mathbb{R} \mid x \leq 15\}$, Range: $\{y \in \mathbb{R} \mid y \geq 0\}$</p> <p>c) Domain: $\{x \in \mathbb{R} \mid x \geq 0\}$, Range: $\{y \in \mathbb{R} \mid y \geq 15\}$</p> <p>d) Domain: $\{x \in \mathbb{R} \mid x \leq 15\}$, Range: $\{y \in \mathbb{R} \mid 0 \leq y \leq 30\}$</p>	1
2	<p>$F(x) = 30 - 2x$ is called</p> <p>(a) Linear Function</p> <p>(b) Polynomial Function</p> <p>(c) Modulus Function</p> <p>(d) Identity Function</p>	1
3	<p>Instead of $F(x) = 30 - 2x$ if $F(x)$ defined as $32 - 2x^2$ than domain is</p> <p>(a) $[-4,4]$</p> <p>(b) $(-4,4)$</p> <p>(c) $[0,4]$</p> <p>(d) $(0,4)$</p>	1
4	<p>Range of $32 - 2x^2$</p> <p>(a) $[-32,0]$</p> <p>(b) $(-32,0)$</p> <p>(c) $[0,32]$</p> <p>(d) $(0,32)$</p>	1
	<p>Case Study 2</p> <p>After retirement, Mr. D. N. Sharma purchased a farm house in shape of quadrilateral ABCD with $\angle A = 90^\circ$, $\angle B = 72^\circ$, $\angle C = 108^\circ$ and $\angle D = 90^\circ$. He also purchased a horse and cow. One day, he tied the horse with a rope at vertex B and observed that it describes an arc of length 88 m when it moves along a circular path keeping the rope tight.</p> <div style="text-align: center;">  </div>	

5	<p>What is radian measure of $\angle B$?</p> <p>(a) $3\pi/5$</p> <p>(b) $\pi/5$</p> <p>(c) $2\pi/3$</p> <p>(d) $2\pi/5$</p>	
6	<p>What is length of rope?</p> <p>(a) 70 m</p> <p>(b) 80 m</p> <p>(c) 72 m</p> <p>(d) 60 m</p>	
7	<p>What will be the length of arc described by horse if he doubles the rope length?</p> <p>(a) 172 m</p> <p>(b) 176 m</p> <p>(c) 175 m</p> <p>(d) 178 m</p>	
8	<p>What will be the length of arc described by cow if it is tied at vertex C with the rope of same length as horse?</p> <p>(a) 140 m</p> <p>(b) 132 m</p> <p>(c) 144 m</p> <p>(d) 142 m</p>	
	<p>Directions: (Q.9 – Q.10) Each of these questions contains two statements: Assertion (A) and Reason (R). Each of these questions also has four alternative choices, any one of which is the correct answer . You have to select one of the options (a) , (b) , (c) and (d) given below :</p> <p>(a) A is true , R is true and R is a correct explanation for A</p> <p>(b) A is true , R is true and R is not a correct explanation for Assertion</p> <p>(c) A is true and R is false</p> <p>(d) A is false and R is true</p>	
9	<p>Assertion: If $(x + 1, y - 2) = (3, 1)$, then $x = 2$ and $y = 3$.</p> <p>Reason: Two ordered pairs are equal, if their corresponding elements are equal.</p> <p>(a)</p> <p>(b)</p> <p>(c)</p> <p>(d)</p>	1
10	<p>Assertion: cosec x is negative in third and fourth quadrants.</p> <p>Reason: cot x decreases from 0 to $-\infty$ in first quadrant and increases from 0 to ∞ in third quadrant.</p> <p>(a)</p> <p>(b)</p> <p>(c)</p> <p>(d)</p>	1

Answer Key

Ans1	The best option is (d) Domain: $\{x \in \mathbb{R} \mid x \leq 15\}$, Range: $\{y \in \mathbb{R} \mid 0 \leq y \leq 30\}$.
Feedback	Negative value of x & $f(x)$ is not possible so $f(x) \geq 0$ i. e. $x \geq 0$ & $30 - 2x \geq 0$
Ans2	Ans: (a)
Feedback	Maximum power of x is 1

<u>Ans3</u>	Ans: (c)
<u>Feedback</u>	$f(x) = 32 - 2x^2$, Negative value of x & f(x) is not possible so $f(x) \geq 0$ i. e. $x \geq 0$ & $32 - 2x^2 \geq 0$
<u>Ans4</u>	Ans: (c)
<u>Feedback</u>	Negative value of f(x) is not possible so $32 \geq f(x) \geq 0$
<u>Ans5</u>	(d) $2\pi/5$
<u>Feedback</u>	radian measure of $\angle B = 72 \times \frac{\pi}{180}$
<u>Ans6</u>	(a) 70 m
<u>Feedback</u>	length of rope = $88/(2\pi/5)$ [$r = l/\theta$]
<u>Ans7</u>	(b) 176 m
<u>Feedback</u>	length of arc described by horse = $140 \times (2\pi/5)$ [$l = r \theta$]
<u>Ans8</u>	(b) 132 m
<u>Feedback</u>	length of arc described by cow = $70 \times (3\pi/5)$ [$l = r \theta$]
<u>Ans9</u>	(a)
<u>Feedback</u>	A is true , R is true and R is a correct explanation for A
<u>Ans10</u>	(c)
<u>Feedback</u>	A is true and R is false because $\cot x$ decreases from ∞ to 0 in first quadrant
